Transfer Rolls

Tektronix offers three different transfer rolls to meet your particular needs. Choose the 3-Color Transfer Roll for beautiful prints and faster print times. For extra rich prints, use the 4-Color Transfer Roll with its separate black ink panel. Use the Black Transfer Roll for fast, monochrome printing.

Upgrades

RAM Upgrade

Adding RAM SIMMs to the standard RAM in your Phaser 440 increases the printer's power and performance. With one 16-Mbyte upgrade (total of 32 Mbytes) you can print on Letter Extra-size paper and use a 4-Color Transfer Roll. With two 16-Mbytes upgrades (total of 48 Mbytes) the printer processes complex images almost twice as fast, plus handles more downloadable fonts. With three 16-Mbyte RAM SIMMs added, the printer is able to handle the most demanding applications and images.
